

XM instant traffic & weather is a great service when a person is traveling, getting traffic info on am or fm radio is a joke. A person ends up in a traffic jam or bad weather before you ever pick up a station, and then you have to wait for all the commercials to end before you get any info or there is inference from power lines.

I pay for these services. Why should the NAB dictate what i listen to? Of course when a " SPECIAL INTEREST GROUP" can't stand competition they run to a goverment agency for help. I cant' understand why this is even an issue.

I urge the FCC to reject the NAB's petition 04-160

Respectfully
Al Whichelo, XM subscriber
